

Crack Off-Campus

Previous Interview Experience

Company Name: Arcesium

Role: Software Development Engineer

Interview Process

Round 1: Technical round (45 Mins)

Interview started with a string question of medium level, then the interviewer asked some SQL queries and finally some easy-to-answer OOPs questions were asked.

Overall, an easy round for Arushi, she cleared it easily.

Round 2: Technical Round

Started off with a project discussion, and then a lengthy question-answer session on OOPs concepts.

He then asked if Arushi was comfortable with Tree Data Structure and asked some questions such as what is self-balancing Tree.

Overall around more focussed on grilling candidates on beginner topics

Round 3 HR:

Final round was taken by HR. It revolved around Arcesium and its products. Some questions were asked about previous experience as well.

Note:

The questions asked in interview rounds aren't fixed and may vary each time. We're sharing these with you to help you get an idea of what to expect and to better understand the interview environment.
